

Product Requirements	Priority	T-shirt Sizing	Reason
<p>As a user</p> <p>I should be able to able to click and view a car details with an image</p> <p>So I can take a look at the car</p>	Must	L	This would require the DB to be created with a compatible Front end technology.
<p>As a user</p> <p>I should be able to place an order for the car</p> <p>So I can complete my purchase</p>	Must	L	Enabling transaction involves - placing order, payment and vendor creation
<p>As a user</p> <p>I Should be able to search for any car model</p> <p>So I can choose the one I want</p>	Should	L	Using a search technology to retrieve car details and related APIs is time consuming
<p>As a user</p> <p>I should be able to track my order</p> <p>So I know when my car will be delivered</p>	Should	M	Since the transaction capabilities are in place. Ability to create a FE screen for user should be of a smaller duration.
<p>As a user</p> <p>I should be able to book a test drive of the car</p> <p>So I can know if this is a car for me</p>	Could	S	Working with the Vendor system to place an order. The rest is assured and working. Hence, S.

<p>As a user</p> <p>I should be able to see reviews from past purchasers</p> <p>So I can know if this is a good car to buy</p>	Could	S	Reviews can be grouped on the product page to be displayed for the buyer. Should be S as development work is limited.
<p>As a user</p> <p>I want to be able to compare different insurance options</p> <p>So I can get the most suitable insurance</p>	Would	M	Work with the insurance vendor to create/ use available API to rope in insurance data for cars. Develop the API for comparisons post that. Hence, an M.
<p>As a user</p> <p>I want to be able to compare features of different cars</p> <p>So I can determine if the car is a fit for me</p>	Would	M	Will need to find a way to compare car features. This would be a 'M' because the product details are already developed.
